

MANILA

DESIGNER

Studio 66

BESCHRIJVING

When viewed from above the chair's exact dimensions are 76 x 76 cm. The result? A very tight chair. This design became the basis for sofas of various dimensions and looks very light thanks to the high metal frame. Thickened strips on the inner side of the arm rests, and loose HR polyurethane foam stuffed seat and back cushions soften the very strict look of Manila. Optionally, higher back cushions are available.
